

## **Cycling Groups Report to CSG 1.12.14**

The debate regarding cycling in Bridge St continues. We are told that CE are going to put up 'no cycling' signs despite CCC asking for exemptions during the same time as loading for vehicles. This information comes via the letters pages of the Chronicle and I am trying to get confirmation from CE.

A meeting was held with CE regarding complementary sustainable transport measures on the Congleton Link Road.

We were led to believe that because of the state of the Local Plan there could be some doubt about whether the whole scheme would go ahead!!!!!!

We were advised that there are some cycling measures included in the scheme. In our opinion they might as well not bother as these schemes only funnel cyclists onto the existing busy Rood Hill and West Road. We suggest some much larger cycling/walking scheme that gets people to the town centre without using the busy roads. We were advised the only way this could happen is via the Neighbourhood Plan.

We have asked Brian Hogan to be see if the CCC can be consulted as part of the process.
